

Project Management Orientation

1 DAY COURSE

\$375 for CII Members/\$499 for non-members

Description:

This session will provide an overview of the roles and responsibilities of the owner and contractor's project manager. It will provide a perspective of the worldwide project planning and execution environment and how project management must react to changes in this ever changing industry. The session will provide attendees the opportunity to better understand the function of the project manager and how creating an environment where others can work efficiently is the primary role. Throughout the course CII research topics, concepts and tools will be introduced.

Objectives:

Upon completion of this training each participant will be able to:

- Gain a perspective of the project planning and execution environment
- Understand the role of the Project Manager on a project
- Identify a standard project delivery process
- Identify the standard project management knowledge areas related to project management
- Learn how creating an environment where others can work efficiently is the primary role
- Identify and create a RACI chart
- Understand how project management must react to changes in this ever changing industry
